

The background of the slide features a soft, muted landscape. In the upper half, there are silhouettes of mountains in shades of light green and grey. On the right side, several thin, dark branches of a willow tree hang down, adorned with small, dark buds. The overall color palette is earthy and natural, with a textured, slightly grainy appearance.

Acupuncture
et
Procréation Médicalement Assistée

F Phan-Choffrut, Commission Évaluation
Faformec-Strasbourg (novembre 2004)

The background features a stylized, muted landscape. In the upper right, a dark, triangular mountain peak is visible against a light, textured sky. Below the mountain, a range of rolling hills or a plain extends across the middle ground. On the right side of the image, a willow tree with long, thin branches and small, dark, clustered leaves hangs down. The overall color palette is soft and earthy, with shades of beige, light green, and brown. The texture of the background appears to be that of aged paper or a similar fibrous material.

Stimulation Ovariennne

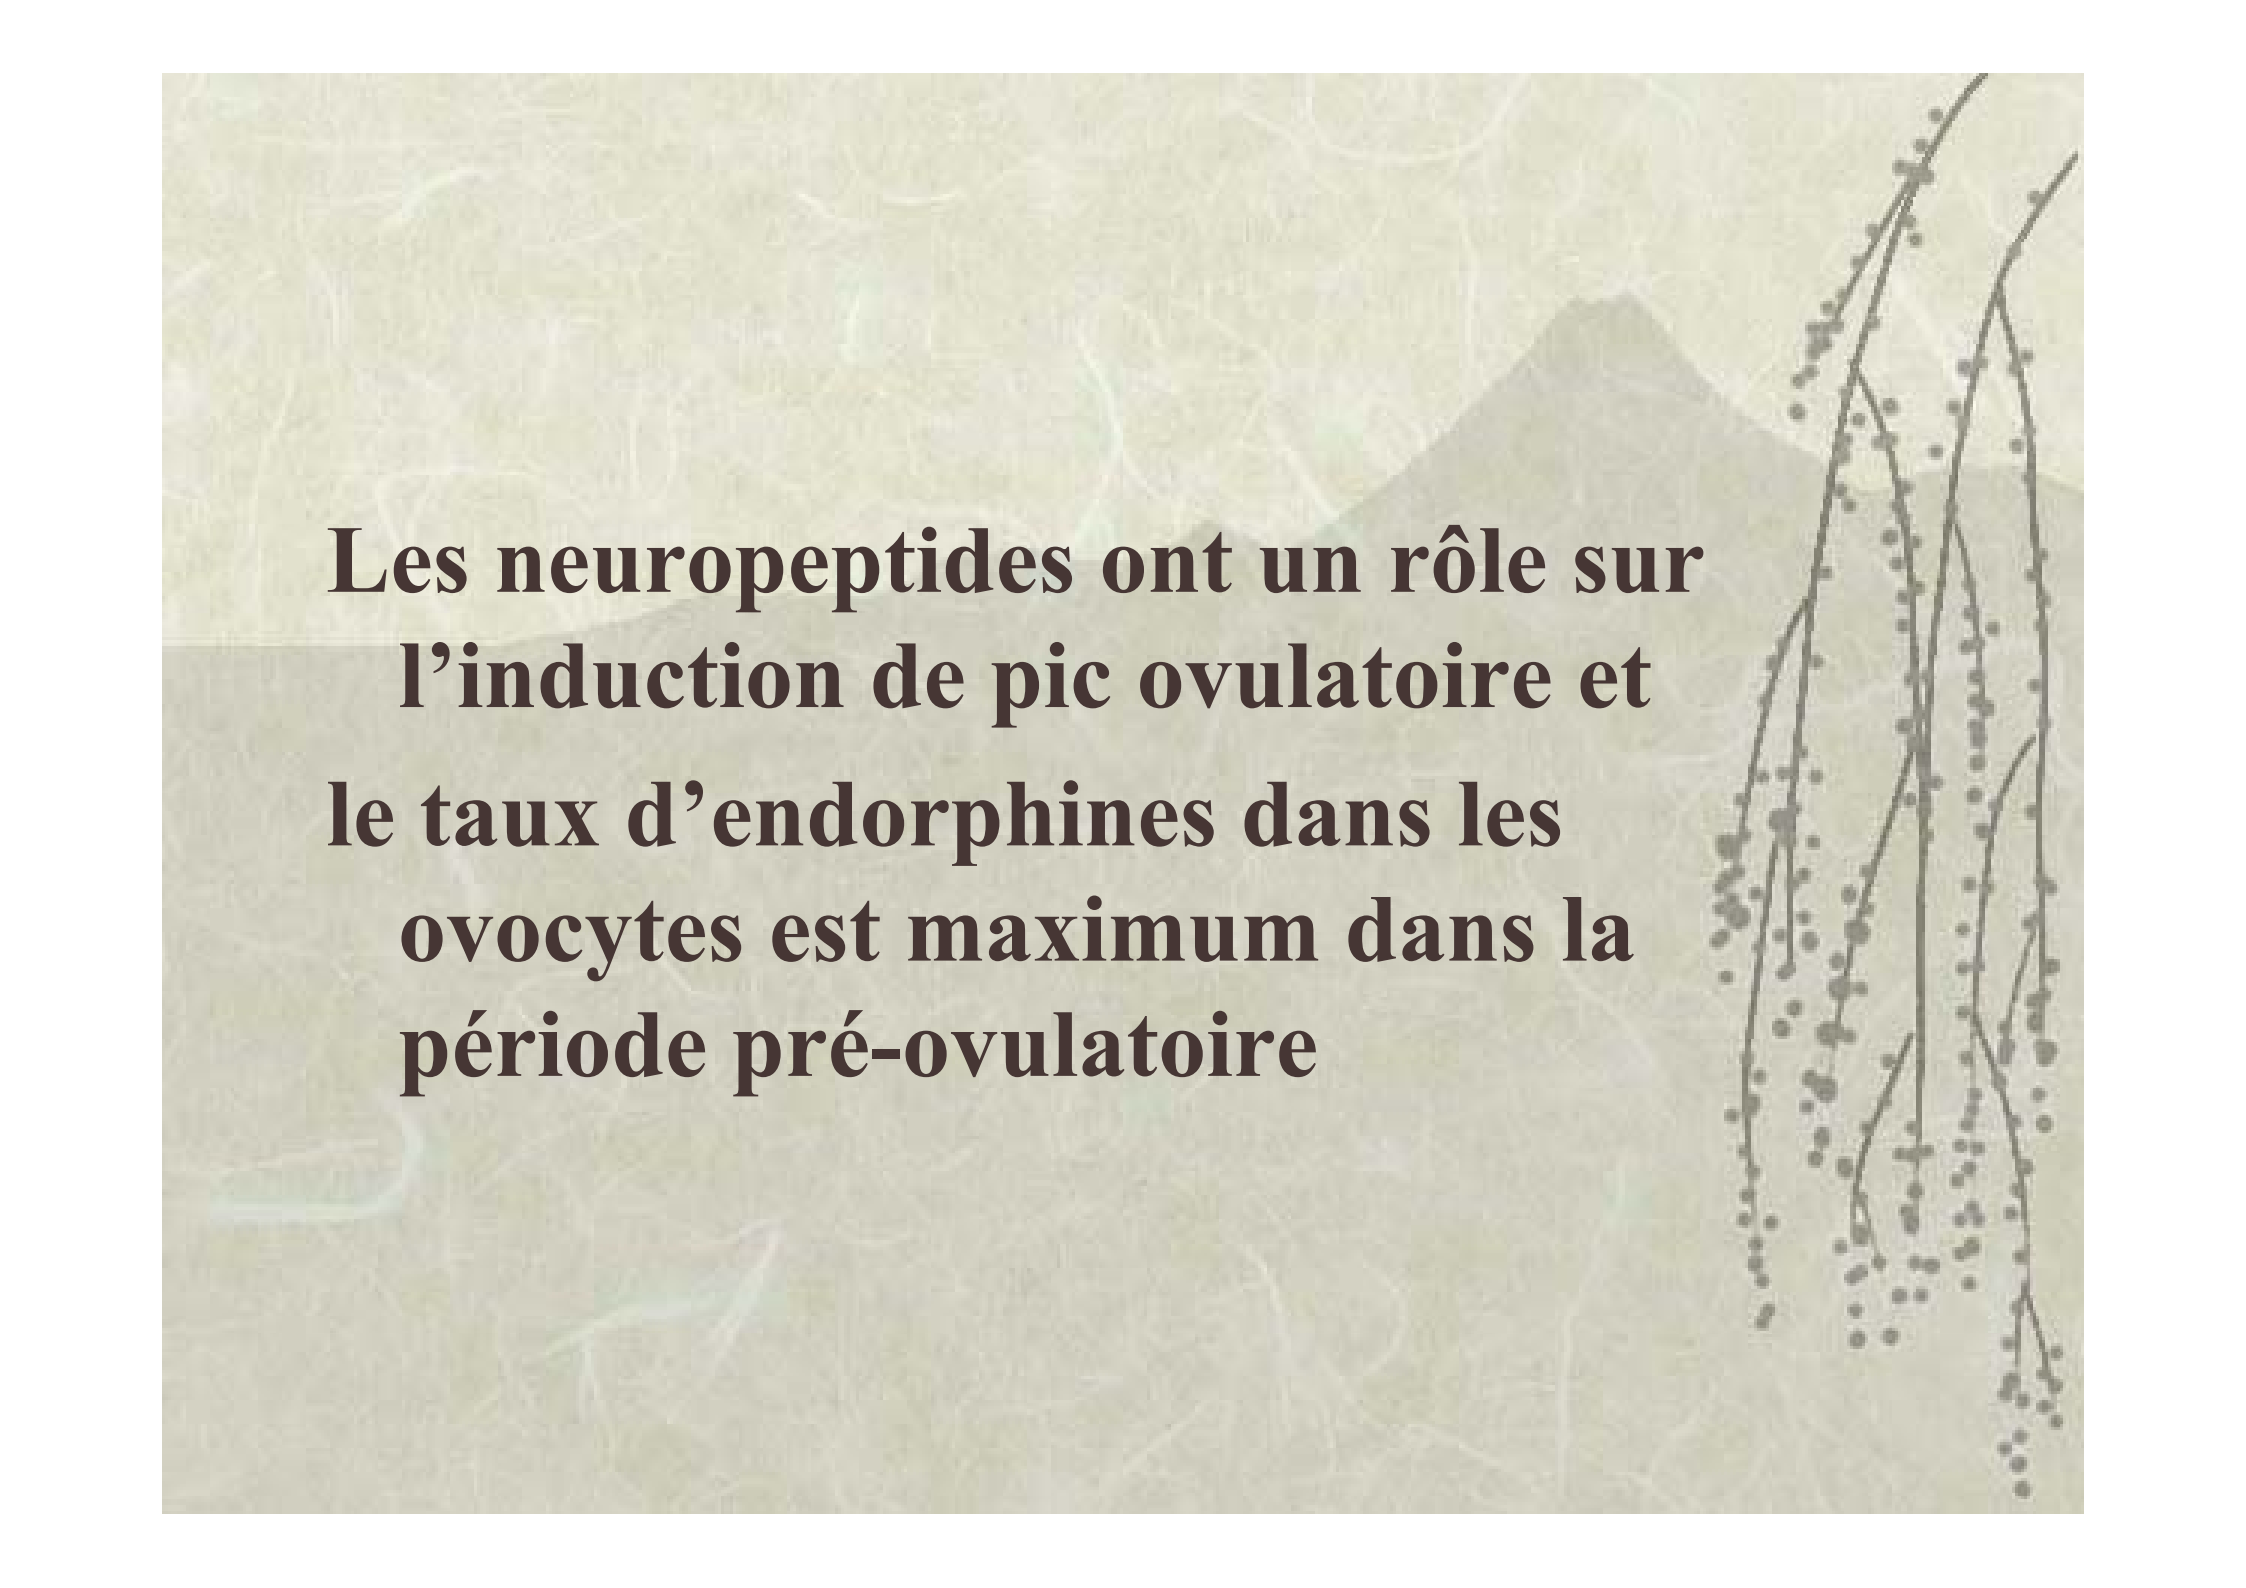

The background of the slide features a traditional East Asian ink wash painting. It depicts a misty landscape with several mountain peaks in the distance. In the foreground on the right, a willow tree with long, thin branches and small, dark buds hangs down. The overall color palette is muted, consisting of various shades of beige, tan, and light brown.

**L'acupuncture augmente
la production de β -endorphines
et autres neuropeptides**

**L'induction de l'ovulation est
cliniquement augmentée par
l'auriculothérapie et
l'électroacupuncture**

The background of the slide features a traditional East Asian ink wash painting style. It depicts a misty mountain peak in the distance and several willow branches with small blossoms or buds in the foreground on the right side. The overall color palette is muted, consisting of various shades of beige, tan, and light brown.

**L'acupuncture agit sur la sécrétion du
GnRH et sur les gonadotrophines**

The background of the slide features a soft-focus landscape. On the right side, there are several thin, dark branches of a willow tree, each adorned with numerous small, dark, round buds or catkins. In the background, a large, rounded mountain peak is visible, its details softened by a shallow depth of field. The overall color palette is muted and naturalistic, consisting of earthy greens, browns, and greys.

**Les neuropeptides ont un rôle sur
l'induction de pic ovulatoire et
le taux d'endorphines dans les
ovocytes est maximum dans la
période pré-ovulatoire**

**Les taux de FSH, LH, progestérone et
oestradiol sont augmentés par
acupuncture**

The background of the slide features a soft-focus landscape. In the upper half, there are rolling mountains in shades of light green and grey. In the lower right corner, a dark, thin branch of a willow tree hangs down, adorned with numerous small, dark, round buds. The overall color palette is muted and naturalistic.

Transfert des embryons

**L'acupuncture augmente le taux de
grossesse dans la PMA**

25 minutes avant le transfert :
1ère séance (durée : 25 minutes)

- ❖ **6MC (neiguan), 8Rte (diji), 3F (taichong), 20VG (baihui) 29E (guilai)**
- ❖ **points auriculaires *shenmen*, utérus, endocrine, subcortex**

25 minutes après le transfert :
2ème séance (durée : 25 minutes)

- ❖ **36E (zusanli), 6Rte (sanyinjiao)**
10Rte (xuehai), 4GI (hegu)
- ❖ **Inverser les points auriculaires du**
côté gauche et droit

Critères de jugement

**Grossesse diagnostiquée par
échographie 6 semaines après le
transfert des embryons**

Résultats

Une grossesse est obtenue dans 42.5% (34/80) dans le groupe acupuncture contre 26.3% (21/80) dans le groupe contrôle (p=0.3)

Conclusion

L'acupuncture peut élever le taux de grossesse à chaque étape de la PMA.
